

Emergency & Disaster Relief

Mobile Kitchens Disaster Relief Management Plan was developed in order to meet Government demand for fast response mobilisation of kitchen facilities to support emergency services personnel as well as displaced members of the public.

Our kitchens have been used during:

- Major flood & bush fire evacuations
- Training exercises
- Major operations

Emergency Response & Mobilisation

Our 24/7 phone line, as well as, in some instances, pre planning with emergency services, enables Mobile Kitchens to react to any situation in the fastest possible time. Our kitchens, when stored, are clean, tested and ready to mobilise.

Some of our recent projects include:

- Mobilising kitchen facilities, dry storage and cold storage to a major flood event in Central Queensland, Australia. Within 3 hours of receiving the call our kitchens were loaded onto trucks and travelling to site
- Supply of temporary facilities for Australian Navy during various Naval exercises across Australia.
