

# Health & Aged Care Industries

## Hospitals

Our portable kitchens have been used to provide temporary kitchen facilities for both state government and private hospitals.

Mobile Kitchens has supplied everything from full commercial kitchen facilities to ancillary equipment such as blast chillers & warming ovens, to hospitals and aged care facilities across Australia & New Zealand. We have also provided temporary kitchen & cafe facilities for onsite visitors & staff canteens.

Additional equipment and support facilities such as cold rooms, preparation modules, dry store facilities and offices are also available from Mobile Kitchens.

## Aged Care Facilities

Mobile Kitchens is the preferred supplier for many of Australia & New Zealand's leading providers of Aged Care facilities, as well as many independent operators.

Our Aged Care Kitchens have been specifically designed with specialist equipment such as brat pans, steam ovens, warming cupboards, and are flexible enough to have client owned equipment installed to help save costs during refurbishments.

Our modules are flexible enough to join together to create a complex large enough to suit your needs. Please contact us to further discuss your requirements.

Some of our recent projects include:
